ACCESSIBILITY AND LANGUAGE SUPPORT

How the library is designed to be easy to read and use, and how to ask for help in another format or language.

TYPE: GUIDE REVIEWED: NOVEMBER 2026 TIME: 4 MINUTES LEVEL: EVERYONE

AT A GLANCE

- Every guide is written in **plain language**, with short sentences and finance words explained.
- Documents are **text-based PDFs** that work with most screen readers and can be enlarged, printed or translated with common tools.
- Need another format or language? **Ask us**, and we'll do our best to help.

How the library is designed

- **Plain language**: short sentences, everyday words, and terms explained on first use. See **S-10 Business Words Made Simple: Glossary A–Z**.
- **Consistent structure**: every guide starts with "At a glance" and follows the same order.
- **Readable layout**: clear headings, tables and good contrast between text and background.
- **Text, not images of text**: content can be selected, searched, read aloud and translated.
- **Fillable worksheets**: designed for free PDF readers like Adobe Acrobat Reader. You can also print them and fill them in by hand.
- **Mobile-friendly reading**: documents can be opened on phones, though fillable calculations work best on a computer.

Language support

For now, the library is available in English only. We plan to add other languages in the future. In the meantime, many founders use free translation tools to read guides in their preferred language. Translation tools can make mistakes with legal and financial terms, so check important details with a professional who speaks your language.

Requesting another format

If a document doesn't work for you, contact us at support@projectunderdogs.com with:

- The document code and title

- What isn't working
- The format or support you need, such as large print, a plain text version, or help with a translation

We'll respond within 48 business hours.

Our commitment

We review accessibility as part of our regular review of the library. See **LIB-06 How We Write and Review the Guides**. Feedback from founders helps us improve.
